Consult Scientific Charts for Correct Fit

CHECK THE NEW SIZING SYSTEM BEFORE ORDERING

Under our new sizing system, it may be that you can wear a smaller size than you have been accustomed to buying. Always check your measurements before ordering Fashions. Be sure to read special instructions outlined at right.

Measure each time you order. Your body measurements, not your age determine your size. Follow the detailed Measuring Instructions given below. Determine your figure type by checking with the body type silhouettes shown.

Compare your measurements to the body measurements that are given in the chart for your particular figure type and then select your proper size. These size charts give body measurements, not Wards garment measurements.

If your measurements come between sizes, select the size nearest to your hip and waist measurements. Your bust measurement may vary from the Chart without affecting fit of garment. If in doubt about your size, send us your measurements, also your height without shoes, and we will select proper size.

For Fitted Coats and Suits: Measure your bust, your waist and your hips. For Box and Flare Coats, Toppers: Measure your bust only. If between sizes, please order smaller size. Topper length given with individual descriptions.

For Dresses: Measure your bust, your waist and your hips. The hem on all Wards dresses is two inches unless it is otherwise stated in dress descriptions. The lengths of all Formal dresses are given in the individual descriptions.

For Skirts, Slacks, Shorts, Pedal Pushers and Jeans: Measure waist, hips over type of underclothing to be worn. See Scale on Pg. 95 for Misses' skirts; Scales on Pgs. 71, 74 for slacks, pedal pushers, jeans (lengths given are from top of waistband). Measuring for Blouses on Page 84; for Sweaters, see Page 91.

For Robes: Measure your bust, your waist and hips. Length of each robe is given in individual descriptions. For Jackets: Measure bust only. Select the size nearest your bust measurement. See descriptions for Jacket length.

Measuring Bust—place tape over shoulder blades, fullest part in front. Hold tape snugly.

Measuring Hips—place tape measure over the fullest part of the hips. Hold tape snugly.

Measuring Waist—place tape measure around the natural waistline. Hold tape snugly.

Measuring for Length — let tape follow body from nape of neck to waist; waist to hem.

CRISS-CROSS LACE ON NYLON

(A) The feminine look of lace on filmy White — fashioned with all the grace of a bygone era. There's plenty of modern appeal, too, in the unique way the two bands of lace criss-cross over the front, one at the neck, the other a little lower. The lace is lovely Alencon type, for a look of luxury, and it's matched by the cuffs of the three-quarter sleeves. Shining metal mirror-faceted buttons spark the front and cuffs. Blouse is 15 denier Nylon Tricot, wonderfully hand washable and quick-drying. Stitch-tucked pleats cover front of the bodice, contrast effectively with sheer, full sleeves. Back is lined. White only. Ship. wt. 6 oz.

RUFFLED EFFECT ON NYLON

(C) Here's the newest in Nylon—an improved, dull finish on opaque Nylon which does away with any shiny look. You'll agree it's the sort of all-around Blouse you've been wanting to see — and it's due for lots and lots of wear. The gay Peter Pan collar is edged with sheer, fluted pleating that gives a handsome ruffled effect; is matched with double rows down each side of the bodice. Four rows of stitched tucks emphasize the front pleats, inside the fluted borders. Mock Pearl buttons. Convenient short sleeves. Available in both Misses' and Women's sizes. (Order by bust inch measurement.) Hand wash. Ship. wt. 6 oz. *Please state size, color.*

TUCKED, SCALLOPED COTTON

(E) A truly original styling touch that's bound to bring lots of admiring attention — the softly scalloped outline of the collar, repeated in the cut of the cuffs. At the V-neck collar, scalloping is emphasized by a border of neatly-stitched tucks that repeat the design. Especially unique is the button trim, cleverly set at each side of the neckline, to match buttons at the closing. An expertly detailed blouse, beautifully tailored of Cotton Broadcloth with a silk-like feel. It's "Tebilized" for crease-resistance, washfast and pre-shrunk (no more than 3% shrinkage). DAINTY WING COLLAR NYLON

(B) Face-flattering V-neck set off by a dainty Wing collar that's just big enough. The collar and front closing are delicately trimmed with beautiful Val lace. The front is luscious 15 denier Nylon, and it's permanently pleated for a lasting look of fresh loveliness. Lined, too, for that just-right, subtle sheerness. The back is opaque 40-denier Nylon. Mock Pearl buttons grace the front. Wispy short sleeves complete the totally charming effect. You'll wear it to dress up your suits or compliment your party skirts. A delightfully young style that goes anywhere. Hand washable.

This versatile charmer has a winsome appeal that will make you feel your very best-dressed. The graceful embroidery edges the gently scalloped collar, decorates it on both sides, and spreads lavishly over the front of the Blouse. Glittering mirrored buttons line the front closing. It's a Blouse you'll count on as one of the basic parts of your wardrobe. And one of its very nicest features — it's hand washable Dacron that you just hang up to dry. FACTS ON GAUGE AND DENIER, LENGTHS, STYLES

FACTS ABOUT DENIER: Thickness of the hosiery yarn governs sheerness. High Denier means thicker, stronger thread. 10 Denier is sheerest of Carol Brent Nylons; 80 Denier is heaviest of styles listed.

FACTS ABOUT GAUGE: Gauge denotes the closeness of stitches. Higher gauge means more and closer stitches to the inch and a half, resulting in a finer, duller, sturdier and more snag-resistant texture.

FACTS ABOUT LENGTH: Wards regular length Nylons are an average length to fit the majority of women. Check Size Scale on Page 156 before ordering. Accurate size means longer, more comfortable wear. Wards Monthly Payment Plan, Inside Back Cover.

FASHION SHEERS. Wards sheerest stockings for special occasions. Offered in 10 and 12 Denier, 66 and 75 Gauge Gossamer sheer. 15 Denier, 474 Needle circular knit are the sheerest Seamless.

DRESS SHEERS. For women who want leg flattery plus service. 15 Denier, 60 Gauge is durable, yet de luxe weight for dress. 15 Denier, 51 Gauge is an ultra sheer—sheerer, more delicate.

JOAN BROWNE GUARANTEES PROPER FIT IF YOU MEASURE CAREFULLY

HOW JOAN BROWNE CAN HELP YOU

Joan Browne, Wards expert corsetiere, or one of her trained assistants, is ready to help you select the correctly fitted foundation. Just send all measurements with your order so Joan Browne can send you the correct size. Miss Browne can give this free, confidential advice only on orders accompanied by a complete list of measurements. Please send all information requested to Joan Browne Dept., Montgomery Ward, at your nearest Ward Mail Order House.

GUIDE TO SELECTING CORRECT GARMENT TYPE

Power net or knitted elastic girdles and corselets without bones are designed for light, gentle control. For firm control choose a girdle or corselet with front boning; for firmest control, a boned corset or corselet. Many of these garments have adjustable laces for changing figure needs. A posture aid belt is designed for extra support. The charts below will help you decide correctly. Send your measurements to Joan Browne if you're in doubt about your figure-type.

Measure bust at fullest part —without bra on. Hold tape snugly but not too tightly.

Measure hips at fullest part—place tape over buttocks. Hold tape snugly, not too tightly.

Measure waist at smallest part at natural waistline. Hold tape snugly, not too tightly.

Measure side from waist to place where garment should end. Height does not denote length.

TO MEASURE FOR GIRDLE OR CORSET

1. Measure waist at smallest part. Take measurements over slip only.
2. Measure hips at fullest part, over buttocks. Don't hold tape too tight.
3. Select correct hip size. If in doubt about your size, send all measurements to Joan Browne with your order, she will send your correct size.

If hips measure:	4-7 in. larger than waist	8-10 in. larger than waist	9-11 in. larger than waist	10-12 in. larger than waist
Order garment for:	Small Hip	Average Hip	Average-to-Full Hip	Full Hip

4. Select your most comfortable length—measure at side from waist to place on thigh where garment should end. Correct length will eliminate: thigh bulges; riding up; hose strain; garters opening when you bend.

If length from waist to end of girdle is:	10 to 11 inches	12 to 13 inches	14 to 15 inches	16 to 17 inches
Order length:	Brief	Short	Average	Long

HOW TO MEASURE FOR CORSELET

1. Determine bust development—see How To Measure for Bra below.
2. Your waist measurements should be 5 in. to 6 in. smaller than your bust. If it is smaller or larger, a girdle or corset with a bra is the best for you.
3. Measure hips at fullest part over buttocks. Select correct hip size.

If hips measure:	1-2½ in. larger than bust	3-4½ in. larger than bust	4-6 in. larger than bust	5-7 in. larger than bust
Order corselet for:	Small Hip	Average Hip	Average-to-Full Hip	Full Hip

4. Measure side from waist to place on thigh where garment should end. If you're short from shoulder to waist, select a half-size corselet, Page 200. Correct length eliminates: thigh bulges, riding up, hose strain.

If length from waist to end of corselet is:	12 to 13 inches	14 to 15 inches	16 to 17 inches
Order length:	Short	Average	Long

CHOOSING THE PROPER MATERNITY WEAR

Most physicians recommend wearing a Maternity Foundation at the beginning of the fourth month of pregnancy. For a correct fit, send Joan Browne your present waist measurement and actual month of pregnancy when you send your order. For Bras: Order your present bust size and cup development. (See below.) Maternity foundations and lingerie are on Pages 174 and 175. All these garments are fashioned to give you scientifically designed support before and after your baby is born.

OWN A COMPLETE FOUNDATION WARDROBE

Today's lighter foundations have more elastic to assure greater comfort, better fit, help you achieve a slim, smart figure. Choose the styles best suited to your activities. A corselet gives a long, smooth line, all-over control. A waistline garment with or without bones is controlling and comfortable under suits, tailored dresses. Lightweight styles are ideal for junior figures; for minimum control with sportswear, housedresses. You'll find all foundations wear longer when you alternate wearing them.

SELECTING THE RIGHT BRA—LET THIS BE YOUR GUIDE TO PROPER FIT

Measure fullest part of bust without bra on. If your bust is in between sizes, order next size larger. Example: If your bust measures 35 inches, order bust size 36. Be sure the tape is up in back and on level with fullest part of bust.

The silhouettes below will help you decide your correct bust type. You'll then know which bust cup to order, which bra type will give the outline you desire, plus the proper uplift. Use this guide for bracelettes and corselets, too.

Undeveloped or Very Small Bust in mature or young figures (AA Cup). Emphasize by wearing a padded Bra or slipping bust pads inside special Bra.

Small Development Bust is firm or slightly sagging in young or mature figures. Small Bras (A Cup) will help create a firm, high bust-line for comfortable flattery.

Average Development. Requires av. cup whether bust is firm or slightly pendulous. Average Bras (B Cup) will give a correct fit, high, firm uplift.

Full Development. Only a Bra with full, deep cups will give you needed support. Full Cup Bras (C Cup) will fit well, flatter you and hold bust comfortably.

Extra Full Development (D Cup) has very deep cup for better coverage. Shoulders are usually built-up for secure support and greater comfort.

Pendulous Bust must have a special type of Bra. Tissues are not able to support breasts. Small, Average, Full and Extra Full busts may be pendulous.

Both figure flattery and new-found comfort can be yours in a Joan Browne foundation that features the pliancy of Coilwire.

G "GROW-UP" CRIB. Exclusive Ward design introduced for the first time. A bed that grows with your child until he is teen-age. Modern low design makes baby care easier than with conventional crib. No more stooping or lifting, no noisy drop side to awaken baby—lower end section swings open easily. Mother can then sit on mattress to care for child, see (1). Built low for more safety yet sides are just as high as other cribs. Gate can be left open as child becomes more independent, easy for him to get in and out of bed alone. By removing gates and foot end, crib becomes a youth bed, see (2). Later can be used as Hollywood-style youth-size bed by removing all guard rails. Sturdy rattle-proof construction of Hardwoods, Blond Mahogony finish. Metal glides for easy moving. 77-coil adult constructed mattress to give firm comfortable support through years of use. FACTS TO KNOW BEFORE BUYING A CRIB MATTRESS. Most physicians recommend that a crib mattress have a firm adult-type construction to assure the development of good posture.

Wards Pediatric Crib Mattresses have heavy-gauge Premier spring wire coils firmly secured with strong border rods to prevent edge break down, see fig. 1. The filling is all new White cotton felt with strong woven sisal underpads. Pediatric wetproof covers are of laminated fabric and plastic—resistant to snags and safety pin tears; superior to regular plastics.

Many crib mattresses are made like fig. 2, with a cardboard case over the spring unit to avoid using border wires and more expensive sisal pads. This provides a board-like firmness when the mattress is new but breaks down under rough usage.

HOW TO DETERMINE SHOE SIZE

Properly fitted shoes mean longer wear, greater comfort and healthier feet. Wards guarantee an accurate, comfortable fit. Children's feet grow rapidly, so measure every time you order. Just follow these simple instructions: Sit child in a straight back chair with stocking foot placed firmly on a piece of paper. Do not let the child stand or move until measuring is completed. Mark the distance from back of heel to longest toe. Check distance between those marks with a ruler. If foot measures up to 5⅞ in. use Toddler's Scale on facing page. If foot measures 6 to 8⅞ in. use Children's Scale on Page 320. If measurement falls between two sizes order the largest size. Wards shoes are sized like nationally advertised shoes, so order with confidence.

Width Explanation: Width B-medium narrow; Width C-medium; Width D-medium wide; Width E-wide. For Convenient Credit Terms turn to Inside Back Cover. It's easy to shop at Wards. You may open an account with an order of $20.00 or more.
